

CAPABILITY STATEMENT

Healthcare Capability Statement

Active hospital environments. Infection control protocols. Patient and HIPAA awareness on-site.

INDUSTRY OVERVIEW

Hospitals don't pause for documentation. ORs run, patients move through corridors, ICUs operate. Any scanning crew that can't navigate active clinical space is the wrong partner.

Our healthcare scanning protocols are built for occupied facilities: ICRA compliance, after-hours and weekend mobilization, HIPAA awareness on photography, and field crews briefed on hospital wayfinding, escalation, and code procedures before they set foot on the floor.

CORE SERVICES

- 3D Laser Scanning & Reality Capture
- Scan-to-BIM Modeling (LOD 200 – 500)
- BIM Coordination & Clash Detection
- MEP Detailing & Prefab-Ready Models
- Digital Twins & As-Built Documentation

TYPICAL DELIVERABLES

- Existing-conditions scanning of clinical, support, and infrastructure areas
- ICRA-compliant field protocols (Class I-IV)
- LOD 350 MEP coordination for medical gas, HVAC, and electrical systems
- Renovation and addition planning models
- Digital twins for facility management and capital planning

SPECIALIZED CAPABILITIES

- Infection Control Risk Assessment (ICRA) compliant procedures
- After-hours and weekend mobilization
- HIPAA-aware photography and documentation handling
- Coordination with facilities, clinical leadership, and infection prevention

REPRESENTATIVE METRIC

ICRA IV

Active patient care areas — no disruption

CERTIFICATIONS

- OSHA 10 / 30 certified field teams
- Autodesk Certified Professional — Revit
- Leica RTC360 & FARO Focus certified operators
